PROCEDURE INFORMATION ALMA HARMONY XL PIXEL PERFECT LASER SKIN RESURFACING

WHAT IS PIXEL PERFECT?

Pixel Perfect™ is one of the revolutionary skin treatments from Alma Lasers. The laser treatment can reduce years of **sun damage, acne scarring, age spots, fine lines, melasma & wrinkles.**

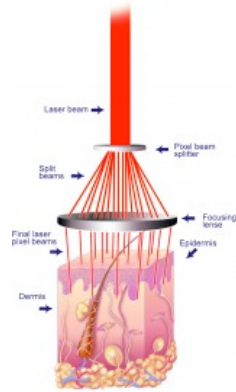

HOW DOES I-PIXEL LASER TREATMENT WORK?

Pixel Perfect™ works by creating thousands of microscopic perforations while leaving the surrounding tissue intact. This allows for very rapid healing and improving your complexion.

Skin resurfacing is a controlled injury to your skin. As your skin heals, the goal is form “good” scar tissue.

Pixel Perfect™ also features the revolutionary iPixel in which the laser output delivers energy in a fast and comfortable way.

In more detail, the Pixel® laser light passes through patented optics to penetrate the skin with tiny thermal channels, only as deep as a few sheets of paper. These micro-sites begin healing as collagen remodels, begin to fade, texture to improve and your inner radiance begins shine.

with deep injury and, scars start skin's to

WHAT HAPPENS DURING TREATMENT?

During the consultation, your laser therapist will carefully examine your skin to determine which resurfacing technique, or combination of treatments, will provide you with the best results.

Your skin type, the severity of any sun damage, the extent of uneven pigmentation and the depth of skin imperfections will be evaluated. Fine lines, coarse wrinkling or deep acne scarring each may require a different approach to treatment.

When the treatment is completed, your resurfaced skin may be covered with petroleum jelly or other protective ointment. In some cases, dressings, tape or a bandage may be applied.

HOW LONG DOES TREATMENT TAKE?

Treatment time depends on many factors and size of treatment area, but can take less than 30 minutes. If your condition is advanced, your treatment may take longer.

WHAT WILL MY SKIN LOOK LIKE AFTER TREATMENT?

Laser skin resurfacing will produce redness and swelling to varying degrees

A scab may or may not form over the treated area. Depending on the type and depth of your skin resurfacing, straining, bending and lifting should be avoided during the early period following your procedure. For deeper resurfacing, you should be able to return to work within a week or two,

DOES IT HURT?

Laser resurfacing requires topical anaesthesia that is usually applied 20 minutes prior to the start of treatment. In most cases, you may feel a slight warming, pressure, or snapping during the procedure. Every client in our clinic has been able to complete the procedure easily.

ARE THERE ANY SPECIAL PRE-TREATMENT INSTRUCTIONS?

We advise you to not take any medications or supplements -- such as aspirin, ibuprofen, or vitamin E -- that can affect clotting for 10 days before surgery.

If you smoke, you should stop for two weeks before and after the procedure. **Smoking** can delay healing.

WHAT ARE THE POSSIBLE SIDE EFFECTS?

Discomfort/burning/bruising/swelling/pigmentation/sarring/infection/blistering.

The Information provided is for reference only; please consult with your LASER practitioner if you require medical advice regarding treatment.

AFTERCARE INSTRUCTIONS

Sterile dressing to remain for 24hours

Clean treated site every 3-4 hours with sterile water for 24 hours (this can be cooled boiled water)

Apply **VAGHEGGI EMOZIONI** protective & comforting healing cream twice daily.

Avoid sun exposure to reduce the chance of hyperpigmentation or darker pigmentation. We strongly recommend **VAGHEGGI sunscreen SPF30** at all times throughout the course of treatment.

Healing can take SEVERAL weeks.

Skin may remain pink for several weeks.

In the case of men who have undergone resurfacing procedures, shaving must be delayed for a while.

About seven to ten days after your skin resurfacing procedure, a new skin will have begun to form.

A scab may or may not form over the treated area.

Depending on the type and depth of your skin resurfacing, straining, bending and lifting should be avoided during the early period following your procedure.

For deeper resurfacing, you should be able to return to work within a week or two.
