PROCEDURE INFORMATION VAGHEGGI NON-CHEMICAL SKIN PEEL

WHAT IS A NON-CHEMICAL SKIN PEEL?

The VAGHEGGI non-chemical peel range in combination with the VAGHEGGI TENTAZIONE SKIN CARE can treat various skin conditions and disorders.

Many skin problems are associated with an excessive build up of dead skin cells, which make the skin thick and dull, usually clogging the pores.

Skin peels can offer a revolutionary way to effectively treat ageing skin, acne, reduce sun damage and hyper pigmentation. This procedure can also help the skin to appear smoother, healthier, plumper and tighter.

BENEFITS

- Reduces sun damage, fine lines, shallow acne scars, dry or rough skin, dull skin tone, hyper pigmentation, acne and enlarged pores.
- Improves the appearance and condition of skin
- Dead skin cells are replaced by healthy ones improving clarity and brightness

HOW DO THEY WORK?

In this treatment, the peels rapidly exfoliate the upper layer of the skin to give room for dead skin cells to slough off effectively.

This action gets rid of all debris and irritants from the skin and prevents excess sebum from clogging the hair follicles. When this happens, instances of blocked pores and formation of pimples are reduced.

We offer a range of peels as highlighted below:

Treatment for wrinkles intensive exfoliating treatment ... The application increases the face's tonicity and luminosity and signs of aging are attenuated while maintaining great tolerability.

Skin with blemishes specific S.O.S. treatment ... The application smoothes horny thickening, increases tonicity, the blemishes are attenuated and the aspect of your skin becomes uniform.

Mixed skin - after acne treatment ... The application of the product increases tonicity and reduces shininess; minor wrinkles are attenuated while maintaining the highest tolerability.

WHAT HAPPENS DURING TREATMENT?

Initial consultation with our aesthetic nurse is required to assess your skin and suitability for a skin peel. We usually recommend a course of 4 skin peels in 4 weekly intervals to achieve the maximum benefit of treatment.

Your skin will be thoroughly cleansed in preparation for treatment. The combinations of lactobionic acid with glycolic acid and retinol makes this professional treatment unique as it boosts the cellular renewal action with a proven restructuring, moisturizing and antioxidant action.

The solution will vary in strength to produce a light peel. Following treatment, a neutralising agent will be applied to the treatment area.

HOW LONG DOES TREATMENT TAKE?

The entire procedure takes approximately 15 - 30 minutes,

DOES IT HURT?

During a non-chemical peel, most people feel a slight tingling sensation that lasts about five to ten minutes.

HOW LONG BEFORE I SEE THE RESULTS?

After you have a VAGHEGGI non-chemical skin peel, you might not see the expected results immediately. This doesn't mean the peel didn't work! It simply takes time for your skin to recover from the peel, so it will take time for your skin to show any improvement.

Your skin will usually look better a week after you have the peel and once you have completed a course of treatments.

ARE THERE ANY SPECIAL PRE-TREATMENT INSTRUCTIONS?

We strongly recommend you prepare your skin for your skin peel treatments using the VAGHEGGI TENTAZIONE home care products.

WHAT ARE THE POSSIBLE SIDE EFFECTS?

Some skin types may develop a temporary redness.

The Information provided is for reference only; please consult with your **practitioner** if you require medical **advice** regarding treatment.

AFTERCARE INSTRUCTIONS

Non-chemical peels may be repeated at one to four-week intervals until you get the look you're after.

To optimize and maintain peeling results it is essential to use your VAGHEGGI TENTAZIONI skin care package daily.

You'll need to protect your skin in the sun after a non-chemical peel since your new skin will be delicate. We recommend the use of **VAGHEGGI sunscreen SPF 30** at all times throughout the course of treatment and to reduce the chances of pigmentation.

Do not let your skin dry out. When applying your skin care products ensure you apply gently!

Make-up cosmetics may be used 48 hours after your skin peel.

We recommend the following VAGHEGGI products to compliment your skin and treatment:

www.vagheggi-beauty.com

VAGHEGGI
COSMECEUTICALS
